Monthly Report UBGS – ADC

January 2026

1. Segment Information

1.1 Automotive

- + **Weifu (CN), Isolation Sleeve, Grinova H XE 11602 Black 9230 (GF50H), Pot. 32 t/a, SOP Q4 2026**
OEM MI. Mold trial finished in Dongli. Assembly done and functional test is ongoing in Weifu Nanjing. Next step is to follow up the test result. (SHIK)
- **DFFB, Plastic Gear Fork, Grinova H XE 11627 Black 9205 (GF60H), Pot. 15 t/a, SOP 12.2026**
OEM GMW. Tier 1 is DFFB, total cost saving about 10%. The customer changed the design requirements and boundary conditions for the fourth time and continues expects the fastest possible responses by ADC. The FEA analysis is ongoing. Sales and ADC hold regular technical meetings with DFFB to exchange the progress. (XUJR/XUER)
- + **Ningbo Fengmei Precision (CN), Injection Busbar, Grivory HT2VZ-15H Orange, Pot. 202 t/a, SOP Q2 2026**
OEM Geely. The customer faced the color mismatch and part sticking problems with Kingfa Vynyl 53G15HS. EMS material is without problems. Function tests passed. Next step is to support the pilot production. (HULO)
- + **WXQC (CN), EPB Gear Bracket, Grivory HTV-5H1 Black 9205, Pot. 21 t/a, SOP Q3 2026**
OEM BYD. FEA is complete and reported to the customer. Theoretically Max. Torque result is 90 Nm, which can achieve the same performance as powder metallurgy parts. Next step: support the mold trial at Sinotech. (XUER/CHFI)
- **Paragon (CN), Folding Table, Grilamid TR XE 4139 Black 9231, Pot. 27 t/a, SOP Q2 2026**
OEM Benz. Warpage of molded part cannot be solved by optimizing process parameters. ADC suggested to change main runner from nozzle side to ejector side. The customer will do a MFA to check the performance of this change. Next step: follow up the MFA by end of Jan. (LIPE)
- + **Dongfeng-yipai, Lamellar Bar, Grivona S XE 10767 Black 9915 (GF35), Pot. 20 t/a, SOP Q3 2026**
OEM Dongfeng-yipai. The appearance of Grinova S molded with an old tool was accepted by OEM and Tier1. The new tool will be made according to Grinova S. Next step EMS will support the MFA in Feb. (ZHZA)
- + **Hongqi (CN), Cooling Oil Pipe, Grivory HTV-4H1 Black 9205, Pot. 20 t/a, SOP Q1 2027**
OEM Hongqi. Hongqi started metal replacement project for Cooling Oil Pipe and sent the 3D drawing to EMS for FEA. Next step: Follow FEA result in March. (ZHZA)
- + **Rixin (CN), Cable Protective Layer, Grilamid L 20 G Natural, Pot. 20 t/a, SOP 02.2026**
OEM Various. Rixin got the order from the end-user, project is SOP. Next step: follow up the mass production. (HUAB)
- + **Gausselec, Current Sensor, Grivory HT XE 4027 Black 9916 (HT3-GF30 V0), Pot. 15 t/a, SOP Q2 2026**
OEM Geely. The function tests of the part passed. Next step: support pilot production. (LIJT)
- + **B-Connector (CN), Cooling Line, Grilamid 2D 25 W 20 HLX Black 9992, Pot. 20 t/a, SOP Q2 2026**
OEM Geely. EMS recommend Grilamid 2D 25 W 20 HLX for Geely to improve production yield rate, suggested customer to make a new Die and Pin. The Extrusion trial is schedule for end of Jan. (HAOG)
- + **Stanley (JP), Adjustment Bolt, Grivory HT1VS-5H, Pot. 80 t/a, SOP 04.2029**
OEM HONDA. The lamp evaluations have been successfully passed including vibration, impact and thermal cycle tests. Additional durability testing under more harsh conditions is scheduled to be completed by middle of Jan. (KOTY)

1.2 Industry & Consumer

- + **Nexeo/Quinovare (CN), Pre-filled Syringe, Grilamid TR 90 Nat, Pot. 20t/a, SOP 12.2027**
New needle free PFS(Pre-filled Syringe) with better chemical resistance material. COC couldn't reach good welding line strength. Sampling done after venting improvement. Obtain test result by 31st Jan. (LICR)
- + **Siwei/Dreame (CN), Arm Cover, Grilamid TR 55, Pot. 10t/a, SOP 06.2026**
New designed part for domestic robot, requires high gloss surface, hot water resistance and chemical resistance. Support trial run by 10th Mar. (JIAW)
- + **Haier (CN), Water Heater Filter, Grivory GVN-35H, Pot. 10t/a, SOP 10.2026**
New project for water heater filter module was developed by Haier and GVN-35H was specified because of success cases in previous similar application. On site trial supported and 30 pcs samples were molded. Obtain test results by 30th Jan. (ZHBR)
- + **SJS (CN), Fracking Plug Slip, Grinova H XE 11627 (H GF60), Pot. 8t/a, SOP 02.2027**
FEA was shared to customer and customer decided to CNC prototype slip for test. Samples were sent to customer and CNC is ongoing. Support fracking test by 27th Feb. (JIAW/XUER)
- + **Cretia/Google (CN), Drone, Grivory GVX-5H, Pot. 150t/a, SOP 06.2026**
Trial finished and 4.5t was delivered, 5,000 sets pilot run planned in Q1 2026. Support pilot run by 28th Feb. (LINR)
- + **BYD/BAT (CN), HnB E-cigarette Charger Housing, Grilamid LV-5H, Pot. 100t/a, SOP 04.2026**
New material development for impact modified Grilamid TRV is ongoing by ECCH R&D. Obtain development progress and sample materials for trial by 14th Mar. (ZHUE)
- + **Hualong/Yadea (CN), E-scooter Display, XE 11119 (GV-GFX50 V0), Pot. 100t/a, SOP 03.2026**
1st pilot run finished without problem, 2t material was ordered for 2nd pilot run. Support 2nd pilot run by 28th Feb. (ZHVI)
- **Hongfa (CN), High Voltage Fuses, Grivory XE 4027 (HT3V-GF30 V0), Pot. 50t/a, SOP 09.2026**
XE 4027 failed at 1kV @ 50kA short-circuit test. Hongfa arranged 2nd shot-circuit test to double confirm the root cause (EMS material or other components). Obtain result by 20th Feb. (XIOX)
- + **Chint (CN), Temp&Pressure Sensor, Grivory XE 4027 (HT3-GF30 V0), Pot. 15t/a, SOP 05.2026**
Most verification tests have been passed, only "Temperature and humidity fatigue test" is ongoing with low risk. Get the test results by Feb. 2026 (YUPE)
- + **TK-mold/Polycom (CN), Headband, Grilamid TR 90, Pot. 20t/a, SOP 03.2026**
Stress mark has been solved by adding 4% MB XE 3855. Already received mass production order from customer. (XUEA)
- + **Sansheng/Grandsire (CN), Ball Valve, Grivory HT1V-5 FWA, Pot. 50t/a, SOP 06.2026**
JLT (2nd molder) part passed all test and pilot run production start. Around 19 ton material was delivered for two molders (Chuandibai & JLT). Track mass production status by 10th Mar. (JIAJ)
- + **Yuhua/Xinling (CN), Heat Pump Ball Valve, Grivory GVX-6H, Pot. 30t/a, SOP 09.2026**
Aging test finished and 3 part cracked out of 10 samples. Root cause was identified as design rather than material. Visit customer for tooling optimization by 10th Feb. (JIAJ)
- + **Zili/Hikvision (CN), AGV Pulley, Grivory GV XE 10571 (GV-5H LF), Pot. 20t/a, SOP 06.2026**
Metal replacement with cost saving >40%. Tooling was ready but sampling part met noise and wear issue in operation test. Measures as lubricant oil & additional anti-wear plate were implemented for 2nd round test. Obtain test results by 15th Mar. (JIAJ)
- + **Jushen (CN), Robot Dog Legs, Grivory GVL-5H HP, Pot. 20t/a, SOP 12.2026**
New design for medium size robot dog (self-weight 30kg, rated load 30kg), requiring no fracture @ 5-g impact loading. MFA report delivered. Track tooling status by 28th Feb. (ZHUP/XUER)
- + **Linquan/Unitree, Humanoid Robot Foot, Grivory GVL-6H HP, Pot. 15t/a, SOP 09.2026**
Problem solving of Kingfa PPA-GF50 crack issue in impact test. Sampling supported and molded part passed test. 200kg order received. Track pilot run status by 30th Mar. (ZHUP)
- + **TOTO (JP), Faucet Lever, Grivory HTM-4H, Pot. 10t/a, SOP 03.2027**
TOTO started plating test for test pieces at alternative plating company because previous plating company is difficult to adjust etching condition for GM-4H and HTM-4H. Check intermediate test result by the end of January. (OZAN)

2. Market Trends

- Donut Lab introduces its **solid-state battery** to **power production vehicles** at CES. Donut Lab introduced the world's first solid-state battery that is ready for use in OEM vehicle manufacturing. The battery delivers 400 Wh/kg of energy density, it can be fully charged in just five minutes, with a design life of up to 100,000 cycles, and the capacity retains over 99% at -30°C and 100°C. (HUAB)
