Reason classification:

M-Application never went into **Market**. Customer stopped or lost this project.

C-Application went into Market but with another **Company** than our customer. Our customer stopped or lost this project.

T-**Technically** not realized. EMS failed to reach the specific requirements to which we committed at the beginning of the project.

P-We lost the project because EMS increased the **Price**

R-**Requirements** changed. The customer changed the specific requirements than they were defined at the beginning of the project.

S-Customer is not following EMS **Suggestions**. EMS offered a feasible solution but customer refused to implement it.

O-Any **Other** reason, e.g. insufficient hand-over, repeated projects, etc.

- In Automotive, after SSS annual update task, 99x projects set D this month. Most of the projects were lost because the customer changed the requirements and selected a cheaper material or stopped / lost the business to their competitor although we passed the tests. One even dead after SOP due to the customer replaced EMS with lower price material.
- In I&C, many projects were lost because the customer never really started the project or stopped the project due to negative market feedback, although the customer accepted our solution or we even passed the tests. Another main reason for the lost was that customers lowered the requirement and selected a lower price material.
- In general it can be seen that we lose a lot of projects which are weak projects or not real projects yet. That is why we have to concentrate on our Top Applications where we have a real USP. Consequently ADC will challenge the projects even more whether they are ready to be accepted as projects and will reject them if the projects are not yet in a state to be a potential successful project. This does not mean ADC will not support Sales with e.g. mold trials, but ADC might not accept it as a project yet.

Ghost projects are new projects which have been entered into SSS from Sales without a project number. The workflow has been clearly defined as only approved projects with PDS and project number can be entered into SSS. Consequently ADC will treat these Ghost projects with the lowest priority to make sure the capacity of ADC can be spent on the important projects from Sales.

2. Observations

2.1 Comparison of Project status in AD/TCS project vs SSS

- There are 37 + 65 projects which can be lifted to SSS+ from AD/TCS point of view
- There are 4 + 28 projects which Sales thinks the projects are ready to materialize but AD/TCS did not yet achieve the status of "Tests passed" for these projects

Segment	No. of project in different status	
	(+ in ADC project list but other status in SSS)	(+ in SSS but other status in ADC project list)
Automotive	37	4
I&C	65	28

2.2 Analysis of project changes in SSS

The analysis of the project changes in SSS between 16 Dec. 2025 and 15 Jan. 2026 shows the following:

- in Automotive, 46 Main PFAM projects with a potential of 1'418t were lifted, while 71 Main PFAM projects with a potential of 2'351t were lost.
- in Automotive, 90 Main PFAM projects with a potential of 2'404t were set Closed after SSS annual update task.
- in Automotive, 1 Main PFAM project with a potential of 5t was Reserved.
- in I&C, 22 Main PFAM projects with a potential of 602t were lifted, while 30 Main PFAM projects with a potential of 558t were lost.
- in I&C, 10 Main PFAM projects with a potential of 238t were Reversed from + to N.
- in I&C, 105 Main PFAM projects with a potential of 2'159t were changed status from + to C after SSS annual update task.
- in I&C, 5 Main PFAM projects with a potential of 54t were changed status from D/C to + due to wrong set before.

4. Personnel and Various

- **Open positions ADC:** (as below, additional positions to be hired as needed):
 - 1x TPE I&C (Shenzhen), pending
- **Anniversary:**
 - **Mr. George Hao**, AD Automotive, Technical Manager Extrusion and Blow Molding, has been 15 years with EMS.

Congratulations and thanks for his contributions to our company. We wish him all the best in the future and many more years with EMS!

5. Key Activities Next Month

- Preparation for 3-YP 2027-2029 (FNM)
- Tech-days at customers (AD/TCS & CATS)
(FDPT, CATL, Autoliv, Nexteer Suzhou, Aptiv, Huaxiang, Keiper, GWM, Jiaxing Shengyang, Qingdao Sunsong, LS Auto, Xiaomi Beijing, Shandong GEB, Xinda, Amafi, SMC, Henan Fengbo, Hikrobot, Socomec China, Hengli, ECT)

Best regards,

M. Fenner
